Dear Don:

I refer to your letter of April 22 and our various discussions concerning paraquat-triazine combinations.

Following a thorough review of all the information we have on paraquat, including the Industrial Hygiene and Toxicology Bulletin distributed by your Safety Division, the Industrial Bio-Test Laboratories' report of March 30, 1966, and other information supplied by Chevron, we have made the decision to not label or promote the combination of paraquat with the various triazine herbicides at this time.

Should you want to discuss this matter further, we can do so at the forthcoming Regulatory Advisory Committee meeting.

With best regards, I remain

Very truly yours,

GEIGY AGRICULTURAL CHEMICALS

J. J. Hood
Vice President
