Hello Tom and George, please see the attached file. This file contains the draft registration terms for XtendiMax. Please review the terms and send us your concurrence as soon as you are able to. Please note that we may need to enter more specific information to indicate the passing results for some of the protocols that appear in the appendices. If there's anything you'd like to discuss, please let us know.

Thanks,
Dan

Yes, still working on the registration terms and they will go out tonight. I'm having an issue with the label files, so it is possible that I may need to get help with those that could carry label comments into tomorrow morning.

Thanks Mike. We have not talked to Rick. Our general is next week. Just this morning, I e-mailed Catherine to see when your general was. I similarly asked her to get clear direction regarding expectations in light of the bigger effort and deadline. We will be interested to hear how the conversation goes.

Subject: RE: VaporGrip Extra

Good morning, Mike:
Yes, HB can confirm that VaporGrip data has been submitted to EPA. The team has not yet reviewed the submissions, but RD has just created a bean for EFED.

The VaporGrip submission package concerns EPA Reg. No. 524-617 (M1768 Herbicide / XtendiMax® With VaporGrip® Technology), and potential benefits claimed from adding MON 51817 (the adjuvant) in a tank mix with M1768 Herbicide. The MRIDs associated with this submission are 51134100 - 51134105.

Detailed Bibliography:

- Transmittal Document (MRID 51134100)
- Summary of Studies Conducted with MON 51817 in XtendiMax® With VaporGrip® Technology Tank Mixtures (MRID 51134101)
- Bibliography of MON 51817 Spray Drift and Volatility Data (MRID 51134102)
- Report: Field Volatility of Spray Solutions Containing Dicamba for Post-emergent Uses: Mon 76980 (22 oz/A) with different tank mix partners (MRID 51134103)
- Report: Deposition and Air Concentration Modeling for Dicamba Formulation MON 76980 with Different Tank Mix Partners – 2018 Arizona Field Trial (MRID 51134104)

- Report: Off-Target Disposition of Spray Solutions Containing Dicamba Formulations MON 76980 and MON 119151 (MRID 51134105)

Subject: VaporGrip Extra

Alex met with Bayer yesterday to discuss several topics. One of those topics was their new VaporGrip Extra technology.

I know we only just received the data (Bayer mentioned that they submitted it in early May) so it is likely that the team is only starting to look at those data. With that in mind, it would be helpful to get an early read (even qualitatively) on what the data show in terms of promise for this technology in reducing vapor drift. Bayer will want to engage on this adjuvant soon, so any initial reactions could be helpful in some of the upcoming discussions that are likely to occur.

Thanks Lydia. Can you tell me if these are the copies that everyone's comments are combined in? I saw two more emails for Dan R's on Xtendimax (are they the same), so I'm thinking that I use that one for Bayer's. Do the other two here have complete sets of comments? I'm trying to figure out which ones I'm supposed to be looking at and then forwarding on.

Thanks,
Dan

It sounds like many of us are ready to talk again. Shall I set up a call for now?

Emily, I looked at the XtendiMax reg. notice. My main comments are:

1. We should be sure in our documents to capitalize the M in XtendiMax.
2. For the protocols, do we want to include the paragraphs of intro text in addition to the testing protocol itself, or just the testing protocol itself?

Subject: Draft Existing Stock Terms
Attachments: A21472 (Tavium) Draft Terms Existing Products.docx

Hi Dan and Marietta,

Thanks for the call this morning. As discussed, please find attached proposed terms to ensure clarity related to existing stocks. These were based upon the existing stocks provisions in the 2018 registration actions for Xtendimax and Engenia. The only changes with have made are company and product identity as well as updating dates to reflect the current 12/20/2020 expiration date on current products and the 12/20/2025. I have also indicated the registration date of 10/27/2020 under the expectation that is correct.

I have also prepared our label team for the final edits and will make those quickly once we see language Emily is working on. We have discussed the language around managed areas and rights of way and agree to adopt the language the we discussed this morning.

Thanks
Monty

Subject: labels for secondary review

Here are the labels for Xtendimax, Engenia, and Tavium. Since everyone is busy working on the decision document and registration notices, please get your comments to me by **noon tomorrow** so I can condense and send them to the registrants. Let me know if you have any questions or concerns.

Here are all three for easy access. Emily didn’t have time to add to Xtendimax (I misread that last email, but she’s still great!)

A huge thank you to Emily for all your hard work on these labels and combining them while I was offline. Dan K – These two labels are ready for your review, Emily just sent the email with her comments on most of Xtendimax. I'll check back in in a few hours (between 9 and 10pm after my flight lands) and will go over all the comments then send it off to the registrants.

Best,
Lydia

It sounds like many of us are ready to talk again. Shall I set up a call for now?

Emily, I looked at the XtendiMax reg. notice. My main comments are:

1. We should be sure in our documents to capitalize the M in XtendiMax.
2. For the protocols, do we want to include the paragraphs of intro text in addition to the testing protocol itself, or just the testing protocol itself?

By the way, it seems like Carrie is still in the document. Sarah was noting her changes separately and waiting for her to close out of the document before she entered them, so it's messing us up. We're losing Sarah very shortly.
