Charles

For this amount of money we really need to see a contract so that we know what we are paying for. I do not think we can agree to this price without thinking what the alternatives are. For example we could pay Checkoway \$75 for the paper and then the 'wise men' for reviewing the document. Also, I am concerned that such a large sum may give the impression that we are buying a review that will somehow be favourable to us. I recognise this is not directly about PQ, but this is an annual income to a lot of people. I am copying Alan Nadel so please run this by him as I cannot request this amount of money for a scientific publication without a clear agreement from the senior staff that this is vital to our work programme.

Lewis: I have confirmed that we paid \$250K for each of the two risk factors papers we did previously with Mandel et al. on NHL and multiple myeloma.

The PD risk factors paper will be massive because there are literally thousands of relevant publications that have to be sifted through.

Maybe I just spent 25% of this years budget.

Bloody hell.

Charles

I have a dinner engagement on Wednesday evening, but could do from 4.30 - 6.30pm if you don't mind entertaining Harvey by yourself.

Regards.

Lewis

Harvey: Thanks for your note. There is a SOT workshop session Wednesday afternoon from 1:30 until 4:15 that I must attend. Would it be possible to meet with you and Louis Smith at 4:30 PM Wednesday afternoon (March 19th).

We are arranging to reserve a meeting room at the convention center but I do not have the details yet. If you are available, perhaps we could have an early dinner together that evening.

My cell phone number is 336-601-5335. I have your number from a previous email (425-238-6565). On Wednesday, near lunch, I will contact you so I can identify the place where we can meet.

I will also be writing Jack Mandel to request that he contact you about the risk factors project that we discussed when Martin and I visited.

Best Regards

Charles Breckenridge

Charles -

Mar 19 afternoon should work out well. I'm going to have a lunch meeting with a small group of Mn/neurotox researchers at the SOT meeting (Seattle Convention Center). I should be available 2:00 and later. Please let me know where you'd like to meet. Thanks.

- Harvey
